

To the Residents of Harris County Municipal District No. 153:

Republic Services is pleased to announce that the residents of Harris County Municipal District No. 153 are our newest automated service customers. We applaud your decision in choosing state of the art service technology. This is the safest, most efficient service in the industry and will provide a uniform, clean look for your community. By now, you have likely received your brand new 95-gallon poly-cart at your home.

Your collection days for household garbage will remain the same, **Tuesday and Friday**. Your heavy trash day will now be the **4th Friday** of the month.

All household garbage and bagged yard debris shall be placed in the poly-cart and placed at the curbside for collection. Carts shall be placed as close to the roadway as is practical without interfering with or endangering the movement of vehicles or pedestrians, but in no circumstances may be placed greater than three feet from the roadway. The handle of the cart should be placed away from the street so that the lid opens on the street side.

The Board of Directors of Harris County MUD No. 153 is considering the addition of weekly recycling service to residents of Harris County MUD No. 153. The cost to each household resident for the recycling service would be \$3.09 per month. Please email gastings@municipalops.com to convey your opinion to the Board of Directors as to whether you favor the addition of recycling service.

Republic Services and the Board of Directors of Harris County MUD No. 153 appreciate your cooperation in implementing this change. You may contact us at republicservices.com or at Customer Service (713) 635-6666.

Thank you!
